System Features

- Self-tracking/management solution
- Latest satellite location technology
- Journey history
- Smartphone App
- Web Portal
- 5yr Warranty
- European Coverage
- Un-authorized Movement detection
- Alarm Trigger Notification (where applicable)

Please note Meta Trak LITE is NOT an insurance approved Stolen Caravan Tracking system. Meta Trak LITE is a self-managed tracking solution which IS NOT monitored by Meta Trak for theft.

Subscription Documentation

You will have received an email when your system was activated by your dealer.

This email provides you with:

1. *Details of how to log-in to the web portal and smartphone app.*
2. *Links to download the smartphone app.*
3. *Your contract information.*

Please check all information is correct!

Power Consumption

The Meta Trak product requires a constant connection to the on-board leisure battery. There is an internal battery for emergency use in the event sabotage e.g. battery disconnection or physical attack of the wiring.

In terms of power consumption, the Meta Trak device power consumption is extremely low at <4mA. To put this into context, using the smallest leisure battery of 60Ah it would take >12month to use 50% of the battery power.

	UP-TIME	Minimum Size Battery	Typical Size Battery
Leisure Battery Capacity (Ah)	60	85	110
50% capacity utilisation (Ah)	30	42.5	55
Meta Trak T30 Load (A)	0.0035	0.0035	0.0035
Duration (Hrs)	8571	12143	15714
Duration (Days)	357	506	655
Duration (Months)	12	17	22

Alerts

Battery Disconnection (Power Sabotage)

In the event of battery disconnection, a **push notification** will be sent to your smartphone (provided you have the Meta Trak app running).

Caravan Alarm Triggered (where applicable)

In the event of the caravan alarm being triggered a **push notification** will be sent to your smartphone (provided you have the Meta Trak app running).

Low Caravan Battery

In the event of the caravan battery becoming low (<11.5V) a **push notification** will be sent to your smartphone (provided you have the Meta Trak app running).

ID Tag Battery Low

In the event of the ID Tag battery becoming low a **push notification** will be sent to your smartphone (provided you have the Meta Trak app running).
Replace as soon as possible!

Un-authorized Movement Detection

Whenever the caravan begins moving the system will begin looking for the ID-tag.

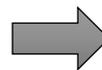

In the event of the caravan being towed without the ID-tag present a **push notification** will be sent to your smartphone (provided you have the Meta Trak app running).

In normal use, the ID-tag may be located in the towing vehicle.

However, due to varying environmental factors it may be required to locate the ID-tag inside the caravan whilst being towed.

Remember to take the ID-tag with you whenever you leave the caravan!

ID Tag

Fig. 1

NOTE: the push button of the Driver ID Tag is NOT REQUIRED to be used in normal operation.

Maintenance

Replacing the ID Tag battery

Battery Type: CR2032

Carefully prise apart the upper and lower parts of the ID tag.

Slide out the battery observing the orientation.

Slide in the new battery in the same orientation.

Re-assemble the tag; normal operation will be resumed.

See our how-to video at:
